Subject: Feedback Infection Prevention & Control Practice Standard.

Q1.
Do you agree/disagree with the proposed Infection Prevention and Control Practice Standard?
If you disagree, please detail why.

I agree.

Q2.
Does any element of the proposed Infection Prevention and Control Practice Standard require clarification or further guidance? Please explain.

- 1) Water testing in practice....does not mention the frequency. If on an MDU – would that be every move?, in fixed facility – would that mean annually or if circumstance changes e.g. flooding etc?
- 2) Item 14. Packaging. Doesn't mention at all that load numbers on packaged CI be recorded with non-ink pen....should we clarify water-based pen only??

Q3.
Do you have any further comments on the proposed Infection Prevention and Control Practice?
No

Thank you for the opportunity for feedback questions?

Kind Regards
Sue McFarlane
