Q5

No

Do you support the proposed Supplementary risk management principles for oral health during the COVID-19 pandemic? If you do not support the draft, please share your concerns, reasons for your view, and proposed alternatives if you have any.

Q6

Please share any comments you have below:

There is no evidence that a stand down of 30 minutes post patient leaving makes a difference to the Covid virus not being in a clinical space

With children up to 12 years being classified at moderate risk this will have an impact o service delivery in the school dental service and will increase the inequity gap between Maori and non Maori.

A clinical examination, radiographs, application of fluoride varnish with no use of a triplex could be acceptable as an option to ensure these children are seen.
