Q5

No

Do you support the proposed Supplementary risk management principles for oral health during the COVID-19 pandemic? If you do not support the draft, please share your concerns, reasons for your view, and proposed alternatives if you have any.

Q6

Please share any comments you have below:

With the short sleeve outer protective clothing, I can place a plastic apron over the top. Can we clean this plastic apron, and if so, how? Can we get reusable aprons, and if so, what would be appropriate? The main concern is the amount of rubbish this created from our practice and the environment.

As you mentioned, 5-12 years olds are uneligible for vaccination, so they become a moderate risk. This makes it financially unfeasible to see these patients. And then putting through a covid test seems extreme.

Why make the exception for multi-room but not single rooms for children? That does not make sense. Or make an exemption until they are eligible for both doses.
