

Entry-Level Competencies: Restorative Dentistry (NZ only)

This document describes the entry level competency standard expected of applicants for registration with the Dental Council (New Zealand) in the specialty of Restorative Dentistry.

How will the competencies be used?

The competencies will be used to support a number of regulatory functions by the Council. These functions include:

- Accreditation, to determine if prescribed specialist qualifications in New Zealand:
 - is at the expected qualification level
 - produces graduates at the expected level of competence for dental specialist registration
- Registration of overseas qualified applicants to:
 - assess qualifications for equivalence to an approved specialist qualifications
 - develop assessments or examinations to determine if candidates are at the expected level of competence for dental specialist registration, and
- Evaluating the competence of dental specialists in the context of regulatory processes such as those returning to practice and in the management of a notification.

Assumptions

The following assumptions have been made when developing these competencies. The competencies:

- are not intended to define the scope of the specialty but rather the knowledge and competence of the graduate specialist
- are not intended to define a national curriculum for the education and training in the specialty
- describe the broad areas of competence and assume that other documents such as program curricula will describe the detail under each broad area to accommodate innovation and change in practise over time
- use language and descriptors consistent with those of the New Zealand Qualifications Framework (NZQA) Level 9 Masters Degree to differentiate

Entry-Level Competencies: Restorative Dentistry

specialist practise from that of a general dentist, and

- do not replace other descriptors of the specialty such as those published by specialist academies and colleges that may describe the standard expected of specialists post entry-level.

How to read the competencies

The competencies should be read:

- with an understanding of how they are to be used, and
- in the context of how they are relevant to the particular specialty, this will mean that competencies generic to all specialties may be demonstrated differently in each specialty.

Entry-Level Competencies: Restorative Dentistry

Definition

New Zealand

The *Health Practitioners Competence Assurance Act* (the Act) describes a scope of practice as the health service that a practitioner registered in that scope of practice is permitted to perform, subject to any conditions for the time being imposed by the responsible authority.

The Council publishes a scope of practice as a Notice in the New Zealand Gazette under section 11 of the Act.

The scope of practice for Restorative Dentistry¹ is described as:

Restorative Dentistry specialists practise in the branch of dentistry that is concerned with dental procedures in the dentulous or partially edentulous mouth. This may include operative, endodontic, periodontic, orthodontic and prosthetic procedures.

Specialist Restorative Dentistry is undertaken by a dental practitioner who possesses additional postgraduate qualifications, training and experience recognised by the Council as appropriate for registration.

<p>This means the practitioner needs to acknowledge and address their own biases, attitudes, assumptions, stereotypes, prejudices, characteristics, and hold themselves accountable for providing culturally safe care.</p> <p>Key to providing culturally safe care is that the practitioner understands the inherent power imbalance in the practitioner-patient relationship, recognises and respects each patient as an individual, and enables meaningful two-way communication to occur.</p> <p>Cultural safety requires that all people receive oral health care that takes into account their uniqueness. It is the person and/or their community, whānau or family, hapū or iwi receiving the care who determine what culturally safe care means for them. A well-referenced definition of cultural safety is:</p> <p>an environment which is spiritually, socially and emotionally safe, as well as physically safe for people; where there is no assault, challenge or denial of their identity, of who they are and what they need. It is about shared respect, shared meaning, shared knowledge and experience, of learning together with dignity, and truly listening².</p>	<p>whanaungatanga-based relationships.</p> <p>e. Understand the following concepts in relation to hauora Māori and Māori oral health outcomes:</p> <ul style="list-style-type: none"> • tino rangatiratanga which provides for self-determination and mana Motuhake • equity³ which focusses on equitable health outcomes for Māori • active protection to achieve equitable health outcomes • options which focus on access to oral health care, and delivering the care in a culturally appropriate way that recognises hauora Māori models of care • partner with Māori on delivery of oral health care to Māori to improve access, equity and oral health outcomes. <p>f. Understand that a patient's cultural beliefs, values and practices influence their perceptions of health, illness and disease; their health care practices; their interactions with health professionals and the health care system; and treatment preferences.</p> <p>g. Understand the impacts of racism, colonisation and power imbalance on Māori oral health, and the current state of inequitable access to care and hauora outcomes.</p> <p>h. Provide culturally safe care - as determined by the patient, their whānau or family, hapū or community.</p> <p>i. Recognise that the concept of culture extends beyond ethnicity and includes, but is not restricted to, age or generation; gender; sexual orientation; occupation and socioeconomic status; ethnic origin or migrant experience; religious or spiritual belief; and disability. Patients may identify with several hapū, iwi and/or cultural identities.</p> <p>j. Reflect on their own culture (including their own biases, attitudes, assumptions, stereotypes, prejudices and characteristics) and its impact on clinical interactions and the care they provide.</p> <p>k. Understand the inherent power imbalance that exists in the practitioner-patient relationship and commit to work in partnership with their patients and whānau or family to enable culturally safe care.</p>
--	---

² Williams, R. (1999). Cultural safety – what does it mean for our work practice? Australian and New Zealand Journal of Public Health, 23(2), 213-214.

³ In Aotearoa New Zealand, people have differences in health that are not only avoidable but unfair and unjust. Equity recognises different people with different levels of advantage require different approaches and resources to get equitable health outcomes.

Entry-Level Competencies: Restorative Dentistry

<p>This definition supports the understanding that the relationship between a practitioner and patient is a partnership based on trust and respect, where communication is key in meeting the patient's needs and goals.</p>
